

Moreno Valley Mall—HVAC Install Project

Keeping Shoppers Cool

Moreno Valley Mall recently utilized the professional services of C&L Refrigeration to complete the replacement of their aging rooftop HVAC equipment in Moreno Valley, California. Our construction knowledge and experience with heavy equipment replacement made C&L a perfect choice for this project.

Moreno Valley Mall is a multi-level shopping and entertainment center that features over 130 stores and large brand name shops, making it a prime shopping destination.

C&L Refrigeration was given the assignment to replace eight aging rooftop HVAC packaged units during a scheduled shut down, without interrupting the stores' business before the year-end holiday sales event. C&L was able to successfully complete this demanding project and have the HVAC package units system back on line. This was accomplished by utilizing C&L Refrigeration's unsurpassed engineering and project management teams and our highly skilled air conditioning installers.

Our experienced team of design engineers, construction field install professionals, and service startup technicians pay close attention to safety, construction details, and environmental compliance. We understand the importance of effective coordination required in order to complete a successful and safe project on time. Next time you need old HVAC equipment replaced with minimal downtime, please consider C&L Refrigeration.

QUICK FACTS:

- Replaced eight 35-ton packaged Air Conditioners with new modern energy efficient HVAC equipment
- Minimized downtime and saved money by eliminating the need for any rental chillers and generators
- Safely managed a professional helicopter lift involving more than 24 separate lifts in one day
- Special adapter curbs to meet current equipment footprint
- Completed the project in the early morning hours, before the mall opened
